Eric Semeniuc

415-231-8432 • eric.semeniuc@gmail.com • github.com/esemeniuc • semeniuc.ml

Skills
- Languages: Rust, Go, TypeScript
- Web: Actix, Apollo, Flask, GraphQL, Nextjs, OAuth2, React, Ruby on Rails, Spring
- ML/System: Docker, Kafka, Kubernetes, PostgreSQL, PrestoSQL, PyTorch, Redis, SpaCy, Spark

Professional Experience

Software Engineer at Salesforce   Jun 2020 - Present
Data Engineer:
- Increased data retention ~9x by building optimized multi-node Kafka + Presto ETL pipeline
- Retrofitted report generation system with distributed querying and parallel rendering

Security Engineer:
- Implemented AuthN/Z access controls with OpenID Connect to protect internal resources
- Protected backends with Hashicorp Vault for secure secrets retrieval and rotation

Frontend Engineer:
- Developed & deployed internal on-demand health reports dashboard using Nextjs
- Continuously championed modern frontend (React + TypeScript) to span across all team UIs

Software Engineer Intern at Salesforce   Jun 2019 - Aug 2019
- Developed full-stack release management portal to track and manage SayonaraDB lifecycle
- Reduced data lookups by 80% by consolidating spreadsheets into single GraphQL API
- Codified business processes for release staggers and stages into single reference

Software Engineer Intern at Facebook   May 2018 - Aug 2018
- Designed, developed, and pushed full-stack supplier messaging system to production
- Streamlined bid lifecycle by integrating message history and attachments into bids
- Enabled scaling and uptime improvements by eliminating Oracle APEX

Software Engineer Intern at Salesforce   May 2017 - Aug 2017
- Developed server health monitoring service with Spring framework and Refocus UI
- Achieved near real-time reporting using delta updates and Kafka streaming
- Optimized 99th percentile response times by 50% by contributing fixes to internal tools

Software Engineer at LEAP Learn   Sep 2013 - Aug 2015
- Coordinated & supervised contractors and full time developer to deliver secure student ledger
- Improved visibility of student progress with custom formative assessment system
- Increased IT compliance by implementing security and backup best practices
- Automated instructor workflow by developing Moodle eLearning system

Software Engineer at Amigos Travel   Jul 2012 - Sep 2013
- Built end to end flight search system with JS frontend and Amadeus Selling Platform backend
- Designed and deployed automated PDF invoicing system with PayPal integration

Web Developer at Deals Caddy   Apr 2011 - June 2012
- Implemented algorithm for perpetually decreasing group pricing to incentivize purchases
- Collaborated with contractors to develop group buying e-commerce marketplace

Web Developer at Global Nannies Agency   Mar 2010 - Apr 2011
- Automated nanny/caregiver onboarding with web-based employer matching system

Education

University Of British Columbia - BSc (Hons) Computer Science w/ Dist.   2016 - 2020

Interests: Cycling, snowboarding, motorsport, economics, sunset gazing
